MAKING YOUR COLOURS WORK FOR YOU….

Colour Management for your inkjet print output is a highly important topic to address. Operating systems and editing software continue to develop and advance meaning that the way ICC Profiles are created and used need to advance too.

So, PermaJet have invested in the very latest professional profiling solution to provide customers with the most accurate ICC Colour profiles on the market.

All users of the PermaJet range of papers are automatically entitled to use the FREE ICC Custom Profiling Service - guaranteeing 100% accurate profiles and, in turn, less paper and ink wastage.

The i1 publish software suite from X-Rite is the new, in-house software used for this profiling service, helping build far superior ICC profiles and totally universal for both PC & MAC users – covering all the very latest MAC & PC operating system platforms.

The free ICC profiling service is very straightforward to follow and all customer information is available at www.permajet.com.

For more information on the range either call the team on 01789 739200 or visit the website www.permajet.com
